

WELO Landscape Stakeholder Advisory Group
Landscape Plans Work Session
9/11/2017
- Agenda -

- **Review agenda and proposed items to discuss and provide direction on:**
 - Any to add?
 - Any to delete?
 - Reorganize?
- **Process for today--overview**
- **What' included in landscape area:**
 - Adjacent existing landscape
 - Dry river bed/cobbles
 - Hardscape
- **Invasive Plants**
 - Move from recommendation to requirement
- **Hydrozones**
 - Trees
 - Stormwater
 - Eliminate mixed hydrozones or keep within a set range (e.g., 0.3-0.4 ok)
 - Change from WUCOLS to other standard (SLIDE rule methodology?)
- **SLA's**
 - Different ETAF's for different types of SLA's?
 - Swimming Pools in non-res
 - Stormwater biotreatment areas
 - Passive rec (campuses)
 - Move exempt project types (cemetery, historic sites, reclamation, restoration) to SLA instead of exempt so that they have to develop a water budget?
- **Stormwater Management**
 - Require some treatment, such as storage, sinking, cleaning, on all projects
 - Require separate stormwater management plan
 - Cross reference with local stormwater requirements
 - Add a performance requirement for mulch in biotreatment (staying in place); support with education on suitable mulches for this application
 - Stormwater areas on separate hydrozone
 - Stormwater areas assigned PF of 0.3 (or prohibit use of high water plants)
 - Include stormwater plan with landscape and irrigation maintenance schedules
 - Soils: treat biotreatment mix separately (sampling, amending)
- **Water Meter requirement**
 - Require service meter?
 - Submeter
